

INTRODUCING OUR 21.5" DISPLAY

*Big Performance for
Demanding Industrial
Environments*

• Bigger screen. Bigger insights.

The 21.5" display is the newest addition to our USL family, delivering a wide, detailed view of your equipment and data—right where you need it, at your fingertips.

You can connect any UniStream programmable logic controller to the new 21.5" display for full control and visibility.

Superior Size & Performance in 21.5"

High Resolution

Crisp, detailed visuals for monitoring complex processes and control systems.

Resistive Touchscreen

Reliable, glove-friendly operation in any environment.

Flexible Mounting Options

Panel or **VESA** mount—your choice, your space.

IP66 Rated (Front Side)

Rugged enough for dusty, humid, or splash-prone industrial settings.

VNC Client

Connect to any VNC server, no matter who the vendor is.

It's All in The Details

Reliable performance where it counts—on the plant floor, day after day.

Designed for your industry's demands, with the durability to handle tough environments.

The flexibility to integrate into new or existing systems with minimal fuss.

Choose an HMI that works as hard as you do!
